

## CLEANREX

Product Development Department

April 2022

Page 1 of 1

### PRODUCT DESCRIPTION

Cleanrex is a water-based cleaner. It contains specially selected surfactants. Removes mineral oils and vegetable and animal fats. The preparation is characterised by a low surface tension, due to which, high washing effectiveness is ensured for the details of complicated shapes, while at the same time a low consumption of the product is maintained. It contains no solvents and phosphates, and is non-flammable.

### TYPICAL USES

Cleanrex is intended for cleaning, degreasing of devices and machine parts, washing vehicles, floors and ceramic tiles.

Designed for cleaning elements by immersion and manual washing

It can be used in automatic cleaning machines, pressure units, ultrasonic cleaners and car washes.

It is not aggressive towards the cleaned surfaces (varnishes, plastics, rubber). Effective when diluted with water compared to 1:20.

### PRODUCT PROPERTIES

Physical form	clear fluid
Colour	orange
pH	7-8
Density	ok. 1,01 g/cm <sup>3</sup>
Boiling point	>100°C
Melting point	<-8°C
Index of refraction	1.346

### OTHER INFORMATION

#### Storage

The product should be stored in original packaging. Storage life of the product amounts to 36 months.

#### Method of application

Depending on the degree of soiling, Cleanrex can be diluted with water in the ratio 1:20. For washing heavy contaminants, use the undiluted product. The preparation can be used for washing in bathtubs with the immersion method, in pressure units, ultrasonic washers and applied with a brush, brush, sponge or spraying method.

Cleanrex can be used cold and hot. (up to 80°C)
