PRODUCT DESCRIPTION

Ultra Fast Degreaser F-6 is a fast evaporating degreaser based on aliphatic hydrocarbons. It does not emit toxic fumes and has a delicate fragrance. It does not contain water.

APPLICATION

It is a universal preparation for degreasing metal and ceramic surfaces.

Recommended for surface preparation before using adhesives, Chester two-component epoxy composites, paints and varnishes.

Effectively cleans and degreases brake linings and clutch friction surfaces.

PRODUCT PROPERTIES

Physical form	clear fluid
Colour	colourless
Density	0,75 g/cm ³
Viscosity at 20° C	0,44 mPa s
Self-ignition temperature	380°C
Boiling point	50°C

OTHER INFORMATION

Storage

The product should be stored in its original packaging.

Product in aerosol containers .

Method of application

Apply by spraying on a pre-cleaned surface. Wait for evaporation. In case of larger contamination, wipe with a cloth and repeat the operation..
